Welcome Message

Dear Colleagues,

On behalf of the Mansoura Psychiatry Department and the Egyptian Psychiatric Association, it is my distinct honor to welcome you to
The 12th Annual International Conference

under the theme:
Transforming Psychiatry: Integration, Research, and Advocacy

We are delighted to host this distinguished gathering, which commences on 17 December Psychiatry Department Hall, Mansoura University and continues on 18 - 20 December 2025 at the Steigenberger Hotel El Lessan in Ras El Bar.

This year's conference theme reflects our commitment to advancing the field of psychiatry by aligning groundbreaking neuroscience research with the realities of clinical practice.
Over the next three days, we will engage in enriching discussions, share state-of-the-art research, and explore innovative approaches to patient care.
It is my heartfelt hope that this conference will inspire collaboration, foster learning, and ignite new ideas to enhance our collective mission of improving mental health worldwide.

Thank you for joining us
Your presence and expertise will undoubtedly make this conference a resounding success.
Warm regards

Prof.Salwa Tobar
Conference President

Welcome Message

Dear Colleagues,

It is with great pleasure that ECAPA announces its 4th ECAPA International Child and Adolescent Psychiatry Conference in Ras El Bar 18 -19 December 2025
in collaboration with Psychiatric Department of Mansoura University

TRANSFORMING CHILD & ADOLESCENT PSYCHIATRY

The field of Child and Adolescent Psychiatry has witnessed remarkable developments in the 20th century.

It has changed from a field dominated by the psychoanalytic approach to a field largely embracing the biological model and then the bio-psycho-social model with special emphasis on the interaction between genes and environment.

In the 21st century the influential change seems to be the result of advances in domains outside the field; the prime examples are technology, social media and usage of artificial intelligence (AI). The intersection of the rapid advances in these external domains have forced an unprecedented transformation in the field of child and adolescent psychiatry and societal norms.

The field known to suffer from significant shortages in professionals, training, and resources, seems to have benefited from technology through telepsychiatry, digital therapeutics and online support communities. On the other hand, the same technologies are introducing new ailments as online gambling and a whole set of behavioral addictions with detrimental effects on the wellbeing of children and adolescents.

With your expert contribution this conference promises to be of enormous value, offering, a diversified wealth of clinical and evidence-based information that could be applied in day-to-day practice.

We very much look forward to welcoming you

Suaad Moussa
