Poster Presentation Guidelines

Dear Authors and Colleagues,
On behalf of the **3rd EHS International Orthopedic Congress**, we are pleased to have your participation in our upcoming conference. To ensure a **cohesive and professional display** that highlights the efforts in the research being presented, we kindly ask all **poster presenters** to **print their posters** according to the following specifications:

Poster Dimensions

- **Size:** 120 cm height x 80 cm width

These dimensions have been chosen to create a consistent and visually appealing layout for all posters at the conference.

Guidelines for Poster Preparation

1. **Content Layout:** Please organize your content into clear sections (e.g., Introduction, Methods, Results, Conclusion) for easy readability.
2. **Font Size:** Ensure text is large enough to be read from a distance of about 1 meter.

- Title: 85-100 pt
- Section Headings: 50-60 pt
- Body Text: 30-40 pt
- Captions: 20-25 pt

1. **Visuals:** Use high-resolution images and graphs to enhance the visual impact of your poster.
2. **Printing Quality:** We recommend high-quality printing for clarity and professional appearance.

This adjustment from digital to physical posters aims to enhance the attendee experience through more interactive and engaging displays. Your poster will be showcased on designated boards provided at the conference venue.

Thank you for helping us achieve a unified and polished presentation area that reflects the high standards of **3rd EHS International Orthopedic Congress**. Please feel free to reach out if you have any questions or need further assistance.

We look forward to seeing your work on display!
Best Regards,
3rd EHS International Orthopedic Congress
