OBJECTIVES

1. To present the latest updates in international guidelines of clinical practice.
2. To discuss and critically appraise the current controversies.
3. To highlight the role of modern technology; particularly the artificial intelligence.
4. To promote interdisciplinary collaboration with other medical specialties.

Welcome Message

Dear Colleagues, Esteemed Guests, and Friends,

On behalf of the organizing committee, it is my distinct honor and pleasure to welcome you to the

38th Annual Conference of Dermatology, Venerology & Andrology Department Ain Shams University.

From 10th to 17th April 2026

It is truly inspiring to see this assembly of brilliant minds renowned researchers, dedicated clinicians, and the next generation of medical innovators gathered here to advance the frontiers of medicine.

Over the next five days, scientific sessions will be holding besides interesting case presentation, panel discussions and workshops. This venue will serve as more than just a meeting place; it will be a crossroads of ideas. We are here to challenge assumptions, validate findings, and build the bridges that turn scientific discovery into clinical reality. The program we have prepared is rigorous, and I have no doubt that the discussions we have will shape the future of patient care for years to come. Thank you for being here and for contributing your expertise to this vital dialogue.

Warm regards

Technologies

LipoHANCE®CD4

- Blood Targeting Absorption Route
- Liposomal surface coating technology with Cyclodextrin Matrix
- Enhances absorption in the intestine via:
  - Paracellular and transcellular pathways.
  - Increases the fluidity of lipid bilayer in brush border membrane vesicles
  - Reduce claudin-4 expression- tight junction associated protein - for enhanced permeation.

LipoHANCE®LSE

- Intestinal Lymphatic Targeting Route
- Liposomal surface modification using advanced laurate sugar esters matrix
- Laurate sugar esters matrix enables absorption via M cell-mediated pathway targeting the lymphatic system for effective absorption.
