Message from the Course Director & Director of IICPSR, Al Azhar University,

Infertility contributes to the global burden of diseases, affects quality of life and is rated by WHO and World Bank as the 5th disability for age group 0-59 years. Prevention and treatment of infertility is a reproductive right in line with the agenda of Cairo ICPD 1994 and SDGs.

In developing countries, infertility is a medical and social socio-cultural problem with gender sufferings. Infertility prevention and treatment is a political commitment and contributes to the success of Family Planning program.

The objective of this workshop is to update participants on the prevention of infertility, cost-effective evidence-based methods of diagnosis and treatment of infertility and making the provision of ART services more affordable and accessible in low recourse countries.

The practical part of the workshop provides directions and assistance to the participants to provide complete infertility service, including ART, integrated in reproductive and sexual health services in their own hospitals or countries.

This is the 13th workshop organized by the IICPR. Many of the candidates who attend previous workshops already established their own infertility care centers including ART. I sincerely hope that this workshop will help many other colleagues to provide a better fertility care services including ART for their patients.

The Egyptian Fertility and Sterility Society (EFSS) in collaborating with (IICPSR) in conducting this workshop. This workshop has been accredited 14 hours by **Arab Commission for Accreditation of Professional Programs (ACAPP), Arab Medical Union.**

Wishing you all a very successful workshop.
