ESEART at EFSS 2026

EGYPTIAN SOCIETY OF EMBRYOLOGY AND ASSISTED REPRODUCTIVE TECHNOLOGY

THE LAB SPEAKS

Two Days of Practice, Precision and New Voices in Clinical Embryology

ESEART at EFSS 2026

The Concept

For two days, the ESEART track hands the microphone to the people who actually run the laboratory. **The Lab Speaks** is built on a simple editorial rule: every session must answer a question an embryologist faces on a working morning — not a question that only exists in a journal.

Day One belongs to new voices. Every panelist on Thursday is someone who has not sat on an ESEART platform before — a deliberate act of succession planning, and the most talked-about feature of this program.

Day Two belongs to the bench itself: what must be watched, protected and double-checked, from the follicle to the transfer catheter. The track closes with the two live episodes of the ESEART Podcast, so that the last thing the hall hears is a conversation rather than a lecture.

Program Architecture

- **New Voices in the Lab** — three one-hour panels (45 minutes of discussion, 15 minutes of floor comment) featuring mid-senior and senior embryologists appearing with ESEART mostly for the first time.
- **Fifteen Minutes That Matter** — six invited short talks, tightly chaired, each one problem and one solution.
- **The ESEART Podcast — Live** — two one-to-one conversations closing Friday afternoon, recorded in front of the audience and released afterwards on the Society channels.
- **Mind the Detail** — two Friday panels dedicated to what the embryology and andrology laboratories must never get wrong.
- **From Ovary to Uterus** — a clinical lecture block that gives the embryologist the stimulation, endometrial and procedural context behind every dish.
- **Masterclass for IVF Laboratory and Clinical Leaders** — one 30-minute lecture, “Choosing Is Not Creating”, on what randomized evidence says about embryo selection, presented by Dr. Mohamed Fawzy.
